## Wood's Land Life

Manufactured and distributed by Earth Science Products  
/ Wood's Rooting Compound (Booth #23056)

Contact: Shane Kennedy, 503-678-1216,  
shane@earthscienceproducts.com, www.earthscienceproducts.com

Our Wood's Land Life utilizes recycled "green resources and promotes "sustainability." It breaks down clay soil to behave like loamy soil and releases the nutrients in the soil. It can adjust the pH of the soil to allow the vegetation its most effective uptake of nutrients. It will break down salt and condition over-fertilized soil. The product has been used in golf courses in Japan and in Australia.

## Captiva

Manufactured and distributed by Gowan USA (Booth #11048)

Contact: Dave Burkhardt, 928-446-9928,  
dburkhardt@gowanco.com, www.gowanco.com/tando

The number one insecticide from South America is now registered in the United States (including Oregon and Washington). Captiva is a bio-insecticide product formula using concentrated plant extracts. It is effective on thrips and mites. Captiva causes an increase in pest mobility, resulting in more exposure and vulnerability to insecticides or miticides that act on contact. Improve the performance of your sprays for less than \$20 per tank. Four hour restricted entry interval (REI), zero-day PHI. Labeled for use in greenhouses, nurseries, landscapes, herbs, vegetables and more. See Dave and Geoff in Booth 11048.

## TWIG Wireless Irrigation Control System

Manufactured and distributed by Nelson  
Irrigation (Booth # 7044)

Contact: Steve McCoon, 509-524-7449,  
steve.mccoone@nelsonirrigation.com, www.nelsonirrigation.com

Wireless irrigation control that is designed specifically for use in agricultural irrigation.

## Nature's Source Plant Biotik Water Soluble Pouches

Manufactured and distributed by Nature's Source / Ball DPF (Booth #5044)

Contact: Keely Hawkins, 903-771-0120,  
khawkins@ns-pf.com, www.naturesourceplantfood.com

Nature's Source® Plant Biotik™ is a unique complex of biological compounds formulated to reestablish the beneficial microorganisms in the soil, creating the ideal soil/media environment which is essential for enhancing establishment and healthy plant growth. Nature's Source Plant Biotik strengthens plants' natural immunities and reduces plant stress while aiding in nutrient breakdown, availability and absorption, which also reduces nutrient leaching. While improving soil structure, this microbial soil amendment will stimulate root development and nutrient uptake. Now available in convenient, premeasured water-soluble pouches. Easy! One (¼ lb.) pouch dissolves quickly in 50 gallons of water.

## Evolution Mini

Manufactured and distributed by Fogco Systems Inc. (Booth # 17062)

Contact: Danna Pack, 580-507-6478, danap@fogco.com, www.fogco.com

The Evolution Mini is Fogco's newest introduction to their fog fan product line. Its small, compact design makes it more suitable for confined areas and low ceiling applications. The low dB level allows for use in research labs, offices, warehouses, etc where noise is of concern. This unit requires the use of a 12 volt DC power supply and 6 Watts of 12 volt DC power. Fogco's 12 volt DC Power Supply will provide 30 watts making it suitable to operate up to 5 Mini Evolution Humidification Fans. It will accept 115 volt AC or 230 volt AC incoming power.

## Reclaimed Tin Planters

Manufactured and distributed by Garden Gallery Iron Works (Booth #7019)

Contact: Don Sprague, 1-800-452-5266,  
dspraguesales@aol.com, www.gardengalleryhubbard.com

Garden Gallery Iron Works is introducing a new line of Reclaimed Tin Planters. This is a great use for the tin from old barns that will bring back memories of buildings fading from our landscape. The planters are available in several shapes and sizes to fit small and large garden and deck areas. These planters add a bit of country chic to any space. Manufactured in the USA by Garden Gallery Iron Works.

## Coho Salmon on Cedar Base

Manufactured and distributed by Greenman Stone Ltd. (Booth # 4045)

Contact: Cameron Nichols, 206-228-0321, [greenmanstone@gmail.com](mailto:greenmanstone@gmail.com), [www.greenmanstone.com](http://www.greenmanstone.com)

Greenman Stone's Coho Salmon on Cedar Base is a 20-inch cast concrete sculpture. Originally sculpted by noted Northwest artist Ivy Nichols, it is a very detailed reproduction of a wild female Coho. It can be used indoors or out, is frostproof and is hand antiqued. Also available with a stone base that can be submerged in a water landscape feature. The Coho Salmon is a unique focal point for any garden.

## Native Roots Line of Native Plants

Manufactured and distributed by Native Roots LLC (Booth #3055)

Contact: Andy West, 208-421-3062, [andy@native-roots.net](mailto:andy@native-roots.net), [www.native-roots.net](http://www.native-roots.net)

The Native Roots Line of Plants offers incredible beauty, combining the consistent appearance of an ornamental with the beauty of a native. Our plants are low maintenance compared to most ornamental species. Our selections are specifically adapted to local climate and soil conditions. Our selections are drought tolerant and require less supplemental watering than most. Our selections attract beneficial native pollinators. Native plants have evolved with parasites and diseases in the area and have developed resistance. Our selections are welcomed by wildlife, serving an important role in local ecosystems. By planting native species, you can increase available habitat for many native species.

## Sturdy Cage™

Manufactured and distributed by Oregon Wire Products (Booth #12059)

Contact: Katie Christians, 800-458-8344, [katiec@oregonwireproducts.com](mailto:katiec@oregonwireproducts.com), [www.oregonwireproducts.com](http://www.oregonwireproducts.com)

Our Sturdy Cages™ are easy to install and provide plants more support. They are made from heavy gauge ¼-inch galvanized steel. Each leg has a convenient foot press to help push the cage deep into the soil. The wide base of these inverted plant supports adds stability during wind or severe weather.
