FairTrak Insta-Caliper

Manufactured and distributed by 2nd Sight BioScience (Booth #6055)

Contact: *Monika Cetnarowski, 509-381-2112,
info@2ndsightbio.com, www.2ndsightbio.com*

The 2nd Sight BioScience Insta-Caliper semi-automates counting and sizing inventory in the field. Simply slide the U-shaped head piece around the plant to calculate trunk diameter using break beam sensor technology. The attached ruggedized FairTrak Handheld Computer electronically records plant sizes by variety, location, row, and GPS coordinates. Register a tree as “good,” “cull,” or “other” with the push of a button while taking measurements. The Insta-Caliper is more ergonomic than traditional hand calipers, allowing employees to count and measure without bending over. It’s fast, easy, paperless and efficient, resulting in labor savings and better inventory management. The Insta-Caliper can be adapted to warehouse counting and grading at commercial nurseries.

Western Juniper Landscape Lumber

Manufactured and distributed by Sustainable Northwest Wood (Booth #16062)

Contact: *Terry Campbell, 503-239-9663,
terry@snwwood.com, www.snwwood.com*

Turn an ecosystem challenge into beautiful, durable structures. Our Restoration Juniper Landscaping Timbers are an ideal replacement for pressure-treated lumber for landscaping and gardening applications, including raised beds, arbors, play structures, decks and agriculture. Once installed, this low-cost solution promises decades of beauty and performance without the addition of any chemicals. Juniper’s legendary durability comes from its high content of natural aromatic oils. Juniper lasts much longer than cedar or redwood — up to 50 years or more in ground contact applications. Restoration Juniper is sourced from small mills in the rural communities of Eastern Oregon, where logs are obtained during rangeland restoration projects.

PJB-16 Backpack Sprayer Unit

Manufactured and distributed by Jacto Inc. (Booth #21057)

Contact: *Bertil Albing, 503-691-7918,
balbing@jacto.com, www.jacto.com*

If you’re like most of us, you probably haven’t thought a lot about backpack sprayers. But Jacto has, and is always looking to “build a better mouse trap.” We have developed the “most advanced backpack sprayer on Earth.” The PJB-16 is powered by a long-lived lithium-ion battery that lasts all day. The sprayer is available in 4- or 5-gallon capacities. Features include: five pressure settings, built-in controller diagnostics, a stainless steel wand and more. This advanced technology sprayer almost thinks for itself. The hydraulic “venturi” agitator ensures the contents stay properly mixed. Comfort for the operator is also a top feature. The lightweight PJB-16 requires no pumping and has durable padded straps, resulting in less fatigue for the operator.

AzaSol™

Manufactured and distributed by
Arborjet Inc. (Booth #23063)

Contact: Lauren Doran, 781-935-9070,
laurendoran@arborjet.com, www.arborjet.com

The same 6 percent azadirachtin insecticide you know and love is now available in 0.25 oz. and 2 lb. sizes! AzaSol™ is a broad spectrum insecticide, but leaves no oily residue and won't burn leaves due to its water-soluble, powdered neem formulation. OMRI listed for organic use, AzaSol allows for same day harvest of your food crops! Whether you need to apply in bulk, or resell for homeowner use, AzaSol's new sizes have you covered! Use AzaSol as spray, drench, chemigation or tree injection.

Shortstop®

Manufactured and distributed by
Arborjet Inc. (Booth #23063)

Contact: Lauren Doran, 781-935-9070,
laurendoran@arborjet.com, www.arborjet.com

Arborjet is pleased to announce the availability of Shortstop®, a systemic plant growth regulator for trees! An addition to our already expansive product line, Shortstop is a 22.3 percent paclobutrazol formulation, which slows the growth of ornamental trees, reduces pruning frequency, aids in drought conditions, reduces construction damage and enhances fine root hair growth. It is most effective when applied to the soil near the base of the tree either by soil injection or with basal drench. Use Shortstop on elm, maple, oak and more! No matter your plant health care needs, Arborjet is here for you, from soil to crown.

TREE-äge G4®

Manufactured and distributed by
Arborjet Inc. (Booth #23063)

Contact: Lauren Doran, 781-935-9070,
laurendoran@arborjet.com, www.arborjet.com

TREE-äge G4® is the latest addition to Arborjet's expansive product line. Its 4 percent emamectin benzoate formulation boasts the proven success of TREE-äge®, with the added benefit of a general use label. TREE-äge G4 provides two years of control for emerald ash borer, pine bark beetles, leaf-chewing caterpillars and more. It works well with all Arborjet equipment, and is always ready to use — just connect equipment directly to the bottle. Arborjet's innovative equipment designs and unique formulations will maximize your productivity and reduce labor time. No matter your plant health care needs, Arborjet is here for you, from soil to crown.

Turbulator™

Manufactured and distributed by Magnation
Water Technologies (Booth #18044)

Contact: Mike Jenzeh, 888-820-0363,
info@rainlikewater.com, www.rainlikewater.com

Healthier soils, plants, pipes and equipment with chemical-free water softening Magnation's sustainable water softening treatment transforms your water quality to a softer, more vibrant, and productive state. Bust salts, improve soil infiltration, improve moisture retention and boost soil and plant health, resulting in better quality plants with 20 percent less water, chemicals, fertilizers and inputs. Reduce sodium adsorption ratio (SAR) by 50 percent. Eliminate biofilm and lime scale. Prevent spider mites, use less energy and create zero by-products. Easy-to-install and long-lasting, Magnation's systems require zero maintenance or filters to replace, no added chemicals and no energy. Rainlike Water™ for Horticulture.

Nature's Source® Nursery & Landscape Special 10-4-5

Manufactured and distributed by Nature's Source®/ Ball Horticulture (Booth #5043)

Contact: Janet Curry, 888-839-8722,
jcurry@ns-pf.com, www.NaturesSourcePlantFood.com

Nature's Source Nursery & Landscape Special 10-4-5 brings out the best in everything you grow. Imagine better-toned plants, earlier flowering and darker foliage with just one single liquid formula that mixes easily with cold water. Contains oil-seed extract, which contains "Boost Molecules" (amino acids) known to improve overall plant health. Feeds the plant and the beneficial microorganisms in the soil to promote strong root development. Lower in salts than many water-soluble fertilizers, reducing leaching. Can be used as a foliar mist without burning or stretch. The only plant food you'll need!

GP 3000 On-Demand Label and Tag Printer

Manufactured and distributed by Primera Technology Inc. (Booth #17060)

Contact: Kellie Garber, 763-475-6676,
kgarber@primera.com, www.primerahort.com

The GP 3000 is Primera Technology's new on-demand, full-color tag, stake and label printer. It prints on both sides of tags, stakes, labels and more with pigmented inks that are highly water and UV-resistant. With a built-in cutter and creaser you'll save both time and money — tags and stakes are ready to use.

50 Cell Pot-in-Frame Tree & Shrub Propagation System

Manufactured and distributed by Proptek (Booth #20060)

Contact: Paul Greenley, 831-274-6082,
paul@proptek.com, www.proptek.com

Super long life and environmentally friendly: Frames and pots can last for 10 seasons, often longer, and are made from recycled materials. Flexible and efficient: Pots can be lifted out individually for grading, trimming, grafting and spacing. Fifty pots can be handled at once when moving, filling and potting up, saving on labor costs. Unrivaled root quality: Features specialist and patented root training ribs and aeration holes that encourage secondary root growth and eliminates root circling. Elevated design: Reduces chance of picking up disease as pots are kept away from the ground and puddles. The product eliminates the need for benching as it ensures air flow around the pots for good air pruning and aeration of dirt.
