Bayer Altus™ Insecticide

Manufactured by Bayer (Booth #9006) and distributed by Wilbur-Ellis Company (Booth #11049), Nursery Connection (Booth #8028) and Crop Production Services (Booth #11025)

Contact: Patrick Peterson, 503-329-7941, patrick.peterson@bayer.com, <https://www.backedbybayer.com/production-ornamentals>

Altus is a novel insecticide that can be used before, during and after bloom on a variety of plants to control whiteflies, aphids and other sucking pests. With Altus, growers can utilize long-lasting drench applications for crops (such as poinsettias) and containers (such as hanging baskets). Altus contains a new active ingredient for the ornamentals market: flupyradifurone. Offering flexible, long-lasting performance with no application timing restrictions, Altus is compatible with honey bees, bumble bees and many beneficial insects.

Spear™-O

Manufactured by Vestaron Corporation (Booth #22044) and distributed by OHP Inc. (Booth #14015)

Contact: Donald Lester, 805-407-0277, dlester@vestaron.com, www.vestaron.com

Spear-O provides effective control of ornamental greenhouse pests including thrips, whiteflies and spider mites. Spear-O offers the consistency and effectiveness of synthetic chemistries, combined with the safety profile of biologicals. Spear-O is designed to be non-toxic for fish, birds, humans and other mammals, honey bees and other beneficial insects. Field trials of Spear-O demonstrate results equivalent or superior to conventional control chemicals. The active ingredient of Spear-O utilizes two new modes of action to control insects, which will help delay the emergence of insect resistance, while enhancing product performance. Spear-O is distributed in the U.S. by OHP Inc.

Zeba

Manufactured by United Phosphorus Inc. (Booth #13011)

Contact: Dustin Patman, 806-201-0073, zebainfo@uniphos.com, www.zeba.com

Zeba is a patented, starch-based, superabsorbent soil enhancement designed to keep a constant supply of moisture available to germinating seed, seedlings and plants throughout the growing season. Made from natural cornstarch, each Zeba granule works like a sponge, absorbing in excess of 400 times its original weight in water, forming hydrogels that slowly release moisture back to plants as they need it. Zeba also binds and releases water-soluble nutrients, keeping more fertilizer in the root zone where it can be used by plants. Over time, Zeba is broken down and consumed by naturally occurring microorganisms in the soil, leaving behind no residue.

Eco-1™ Garden Spray

Manufactured and distributed by
Arborjet Inc. (Booth #23064)

Contact: Dawn Fluharty, 781-935-9070,

dfluharty@arborjet.com, www.arborjet.com

Protect your entire garden against a broad spectrum of insects, mites and fungi with all-natural ingredients. Use indoor or outdoor, throughout the season, even on food crops and same-day harvest. Eco-1 is designed to avoid burning, even with frequent use, and its pleasant smell will keep you happy while it kills insects from eggs to adults! Eco-1 is your organic solution for total garden protection.

FSeries TREE I.V.

Manufactured and distributed by
Arborjet Inc. (Booth #23064)

Contact: Dawn Fluharty, 781-935-9070,
dfluharty@arborjet.com, www.arborjet.com

Introducing the new FSeries TREE I.V. micro-infusion® system. Featuring the first-ever 120 psi injection system and the ability to use up to 12 injection lines, the FSeries is designed for maximum speed, accuracy and ease — and it's the perfect tool for your next job.

Nitrogreen 13-0-0

Manufactured and distributed by
JRM Chemical Inc. (Booth #12046)

Contact: Dave Czehut, jrm@en.com, www.soilmoist.com

Nitrogreen 13-0-0 is a certified organic (OMRI approved), 100-percent, water-soluble fertilizer. The fertilizer goes completely into solution for immediate nutrient delivery. Nitrogreen has the highest available nitrogen in the organic fertilizer industry. Nitrogreen is a plant-based fertilizer; it will not burn plants. Packaged in attractive, 14-ounce packages, six in a cut-case display and in bulk packaging.

Orkestra™ Intrinsic® Brand Fungicide

Manufactured and distributed by BASF (Booth #3034)

Orkestra™
Intrinsic® Brand Fungicide

Contact : Eddie Medeiros, 949-607-7324,
Edward.medeiros@basf.com,
<https://www.basf.com/us/en.html>

Orkestra™ Intrinsic® Brand Fungicide is a new broad spectrum fungicide with two active ingredients that protects against 48 plant pathogens and offers plant health benefits. The dual modes of action in Orkestra deliver both translaminar stability to stay where diseases occur as well as systemic outward movement to protect new growth. Orkestra Intrinsic is a foundational fungicide for nursery and greenhouse ornamentals production, where it delivers disease prevention, fast control and residual activity.
